

Environmental Policy

Environmental and Energy Policy

The Foyle Food Group produces quality beef products for the wholesale market and is aware of the effects of its activities, products and services on the environment and recognizes that environmental and energy management is an integral part of the business. In order to regulate the environmental and energy performance the company will operate a management system which meets the requirements of BS EN ISO 14001:2015 for all sites and EN ISO 50001:2011 for Foyle Donegal.

In particular, Top management will:

- Fulfil its compliance obligations i.e. regulations and other requirements applicable to our operations on-site relating to environmental and energy use, consumption and efficiency.
- Ensure minimization and control of waste by conscientious management.
- Protect the environment through prevention of Environmental pollution by controlling site operations and improvement of working procedures.
- Drive continual improvement by reviewing our performance annually and with the correct framework.
- Set specific and practical objectives and targets consistent with our environmental impacts and energy performance
- Provide appropriate information, instruction and training for all employees to achieve effective environmental and energy performance.
- Ensure that this policy and any other relevant environmental and energy information is communicated, implemented, maintained and understood by employees, customers and suppliers within the company.
- Ensure information and resources are available to ensure targets are met.
- Support the purchase of energy efficient product and services and design for energy performance improvement

This Policy is communicated to all employees and is available to the public. It is reviewed regularly and updated as necessary.

A handwritten signature in black ink, appearing to read "Gemma McCollum". The signature is fluid and cursive, written over a light blue horizontal line.
